Investigation Notes

CCTV footage confirms the victim exited the library at approximately 21:14 hrs. Phone location data indicates movement toward the north campus gate before signal loss. Roommate reported unusual behavior and emotional distress in the days prior to disappearance. Campus security identified an unidentified male lingering near the library entrance. Digital forensic teams are recovering deleted messages from the victim's cloud backups.

Conclusion

The case remains classified as an active missing person investigation. Authorities are continuing to gather forensic evidence, analyze surveillance footage, and interview individuals connected to the victim. Coordination with university administration and cybercrime units remains ongoing.
